

T.B.R.[®]

Baby Connect

NEW

Technical features :

- Internal octagonal connection perfect for cases with low prosthetic height
- Internal SwissClip system (adapted to low oral openings)
- Drilling safety through a complete set of specific stop drills

Advantages :

- Primary stability optimization in the cortical as much as in spongy bone through a double threads system : micro and macro synchronous threads
- Flat cruciform apex with rubber sides
- Implantation examples :
 - Posterior mandibular for old toothless cases*
 - In sub-sinus without sinus lift or osteotomes*
- Permanent prosthetic restorations without restricting and costly bone grafts

References :

XS - 406 : Implant Ø 4 mm

XS - 506 : Implant Ø 5 mm

Stop drills Kit of 5 drills with external irrigation : A-TCP007
